

# **The Art and Science of Holography**

**A Tribute to Emmett Leith and Yuri Denisyuk**

**H. John Caulfield, Editor**

**SPIE PRESS**

A Publication of SPIE—The International Society for Optical Engineering  
Bellingham, Washington USA

Library of Congress Cataloging-in-Publication Data

The art and science of holography : a tribute to Emmett Leith and Yuri Denisyuk / H. John Caulfield, editor.

p. cm.-- (SPIE Press monograph ; PM124)

Includes bibliographical references.

ISBN 0-8194-5019-7

1. Holography. I. Caulfield, H.J. (Henry John), 1936- II. Leith, Emmett N. III. Denisyuk, IU. N. IV. Series.

*About the cover:* The image on the front cover is Stephen Benton's "Holography Blocks" [MOH-1976.21.01], courtesy of the MIT museum. Made in 1975, the white light transmission hologram depicts about 24 clear acrylic cubes, each approximately 1 in long on edge. The back cover shows Emmett Leith on the bottom left and Yuri Denisyuk (with holographic self-portrait) on the bottom right.

# Contents

**Preface /** *xiii*

**Introduction /** *xv*

*Charles M. Vest*

**Chapter 1. Holography Reinvented /** *1*

*Stephen A. Benton*

1.1 Dennis Gabor / 1

1.2 Emmett N. Leith / 2

1.3 Yuri Nicholaevitch Denisyuk / 4

Acknowledgments / 6

References / 6

**Chapter 2. Holography: Origin, Development, and Beyond /** *7*

*Francis T. S. Yu and Suganda Jutamulia*

2.1 Origin / 7

2.2 Development / 10

2.3 Beyond / 20

References / 28

**Chapter 3. A Generalization of the Theory of Holographic Coherence**

**Confocal Imaging /** *31*

*Emmett N. Leith, Kurt D. Mills, Wei-Chen Chien, Brian D. Athey,*

*and David S. Dilworth*

3.1 Introduction / 31

3.2 Spectrally Broad Source / 35

3.3 Grating Analysis / 37

3.4 Some Final Remarks / 41

Acknowledgments / 42

References / 43

**Chapter 4. Optical Transforms in Digital Holography /** *45*

*Leonid Yaroslavsky*

4.1 Digital Holography: The Revival after Hibernation (a Second Wind) / 45

4.2 Physical Reality vs. the Computer World: Representing Optical Signals and  
Transforms in Computers / 47

- 4.3 The Convolution Integral and Digital Filtering in the Signal Domain / 49
- 4.4 The Fourier Integral and Discrete Fourier Transforms / 51
- 4.5 Integral and Discrete Fresnel Transforms / 55
- References / 60

## **Chapter 5. Electronic Holographic Interferometry and Its Photographic Origin / 61**

*Karl A. Stetson*

- 5.1 Introduction / 61
- 5.2 Current State of the Art / 61
- 5.3 Enabling Technologies / 64
- 5.4 How It All Began / 66
  - 5.4.1 Coherent optics and holography / 66
  - 5.4.2 The problem of the holograms / 68
  - 5.4.3 Holographic interferometry / 69
  - 5.4.4 Aftermath / 70
- References / 71

## **Chapter 6. Innovative Holographic Approaches for High-Resolution Image Reconstruction / 73**

*Zeev Zalevsky and Kurt Mills*

- 6.1 Introduction / 73
- 6.2 Broad-source Holographic Reconstruction Using Wavelet Encoding / 74
  - 6.2.1 Holographic reconstruction with incoherent illumination / 74
  - 6.2.2 Wavelet transform and a multistage holographic recording / 76
  - 6.2.3 The recording process / 77
  - 6.2.4 D.C. term reduction and the admissible condition / 79
  - 6.2.5 Experimental results / 80
- 6.3 Spatially Partially Incoherent Broad Spectrum 3D Holography / 83
  - 6.3.1 Theoretical discussion / 83
  - 6.3.2 Experimental results / 88
- 6.4 A Generalized “First Arriving Light” Approach for Resolving Images that Are Viewed Throughout a Scattering Medium / 91
  - 6.4.1 Technical discussion / 92
  - 6.4.2 Experimental results / 96
- 6.5 Triple-correlation Processing for Imaging Through Scattering or Turbulent Mediums in Medically Related Applications / 99
  - 6.5.1 Triple correlation / 99
  - 6.5.2 Experimental results / 101
- 6.6 Increased Resolution for Synthetic Aperture Imaging / 103
  - 6.6.1 Analysis / 105
  - 6.6.2 Simulation / 107
- References / 109

**Chapter 7. Image Formation and Young's Fringes / 111***William T. Rhodes*

- 7.1 Introduction / 111
- 7.2 Planar Quasi-monochromatic Objects / 113
- 7.3 The Addition of Color / 117
- 7.4 Extension to 3D Objects / 118
- 7.5 Coherence Function Transformations, Enhanced Backscatter, and Superresolving Imaging Systems / 119
  - 7.5.1 Special case: enhanced backscatter / 122
  - 7.5.2 Special case: superresolving imaging system / 123
- 7.6 Concluding Remarks / 126
  - Acknowledgments / 126
  - References / 126

**Chapter 8. Holography and the Wigner Function / 129***Adolf W. Lohmann, Markus E. Testorf, and Jorge Ojeda-Castañeda*

- 8.1 Introduction / 129
- 8.2 The Wigner Toolbox / 130
- 8.3 The Holographic Principle / 134
- 8.4 The Wigner Chart Applied to Holography / 136
  - 8.4.1 The image plane hologram / 136
  - 8.4.2 Fourier holography / 137
  - 8.4.3 Fresnel holography / 139
- 8.5 Storage Requirements of Holography / 140
- 8.6 Summary / 143
- References / 143

**Chapter 9. Observation of Light Propagation by Holography Using an Ultrashort-Pulsed Laser / 145***Toshihiro Kubota*

- 9.1 Introduction / 145
- 9.2 Recording Process / 146
- 9.3 Reconstruction Process / 147
- 9.4 Observation of Light Propagation Using a Picosecond-pulsed Laser / 148
  - 9.4.1 Refraction of light in a glass block / 148
  - 9.4.2 Total reflection inside the glass block / 150
  - 9.4.3 Diffraction of a grating / 150
- 9.5 Observation of Light Propagation Using a Femtosecond-pulsed Laser / 150
- 9.6 Conclusions / 154
  - Acknowledgments / 154
  - References / 154

**Chapter 10. Processing and Detection of Femtosecond Waveforms Using Ultrafast Dynamic Holography / 157**

*Dmitriy Panasenko, Rostislav Rokitski, Nikola Alic, Dan M. Marom, Yuri Mazurenko, Pang-Chen Sun, and Yeshaihu Fainman*

- 10.1 Introduction / 157
- 10.2 Space-to-time Conversion with Cascaded Second-order Nonlinearities / 158
- 10.3 Time-to-space Conversion Processor—Femtosecond-pulse Imager / 162
- 10.4 Generalized Ultrafast Processing / 164
- 10.5 Phase-sensitive Detection of Femtosecond Laser Pulses Using Sonogram Generation / 166
- 10.6 Conclusions / 170
- References / 170

**Chapter 11. Denisyuk Holography: From Lippmann Photography to Color Holography / 173**

*Hans I. Bjelkhagen*

- 11.1 Introduction / 173
- 11.2 Lippmann Photography / 175
  - 11.2.1 History of interferential photography / 175
  - 11.2.2 The principle of interferential photography / 176
  - 11.2.3 Modern Lippmann photography / 178
- 11.3 Color Holography / 184
  - 11.3.1 History of color holography / 184
  - 11.3.2 Recording materials / 185
  - 11.3.3 Laser wavelengths for color holograms / 186
  - 11.3.4 Recording color holograms / 188
- 11.4 Conclusions / 191
- Acknowledgments / 194
- References / 197

**Chapter 12. Multicolor Holograms / 201**

*P. Hariharan*

- 12.1 Multicolor Transmission Holograms / 201
- 12.2 Multicolor Reflection Holograms / 202
- 12.3 Light Sources / 203
- 12.4 Multicolor Rainbow Holograms / 205
- 12.5 Pseudocolor Holograms / 207
- 12.6 Multicolor Stereograms / 208
- 12.7 Embossed Holograms / 209
- 12.8 Conclusions / 209
- References / 209

## Color Plates

### **Chapter 13. Optical Encoding of 3D Correlation for Color Pattern Recognition / 213**

*Josep Nicolás and Juan Campos*

- 13.1 Introduction / 213
- 13.2 Color Images Described by 3D Functions / 216
- 13.3 Three-dimensional Fourier Transform / 217
- 13.4 Correlation of 3D Functions for Color Pattern Recognition / 218
  - 13.4.1 Three-dimensional correlation filters for color pattern recognition / 219
- 13.5 Optical Implementation / 223
  - 13.5.1 Encoding of 3D functions in 2D images / 223
  - 13.5.2 Encoding of the 3D Fourier transform / 226
  - 13.5.3 Encoding of the 3D correlation / 228
- 13.6 Experimental Results / 232
- 13.7 Summary / 234
  - Acknowledgments / 235
  - References / 235

### **Chapter 14. Holograms of Volumes and Volume Holograms / 239**

*Joseph Shamir*

- 14.1 Introduction / 239
- 14.2 Holograms, Wavefronts and Information / 240
- 14.3 Holography — Planar Recording Medium / 245
- 14.4 Holography — Volume Recording Medium / 247
- 14.5 Special Cases in Volume Recording / 250
  - 14.5.1 Ideal hologram recording and reconstruction / 250
  - 14.5.2 All plane-wave recording / 251
- 14.6 Volume Recording with Paraxial Systems / 253
  - 14.6.1 The paraxial approximation / 253
  - 14.6.2 Generic architecture for volume holography / 254
  - 14.6.3 The motion blur / 258
- 14.7 Conclusions / 259
  - Acknowledgments / 259
  - References / 259

### **Chapter 15. Color Conical Holographic Stereograms: Recording and Distortion Compensation Methods / 261**

*Luis Manuel Murillo-Mora, Katsuyuki Okada, Toshio Honda,  
and Junpei Tsujuchi*

- 15.1 Introduction / 261
- 15.2 Methods of Color Holographic Stereogram Synthesis / 262

- 15.2.1 Original 2D images / 262
- 15.2.2 Hologram-recording method / 263
- 15.2.3 Color conical holographic stereogram recording setup / 265
- 15.2.4 First experimental results / 266
- 15.3 Distortion and Perspective Analysis / 267
  - 15.3.1 Image-processing method / 267
  - 15.3.2 Simulation and results / 268
  - 15.3.3 Experimental results / 270
- 15.4 Conclusion / 271
- References / 273

## **Chapter 16. Teaching Holography / 275**

*Tung H. Jeong*

- References / 284

## **Chapter 17. The Role of Centric-minded Holography in Material Sciences / 285**

*Pal Greguss*

- 17.1 Introduction / 285
- 17.2 Omnidirectional Holograms (ODH) / 286
- 17.3 ODH at Work: Omnidirectional Interferometry / 288
- 17.4 Peripheral Holography: Exoscope Holography / 289
- 17.5 Conclusion / 290
- References / 290

## **Chapter 18. Solar Holography / 291**

*Juanita R. Riccobono and Jacques E. Ludman*

- 18.1 Introduction / 291
  - 18.1.1 Solar power generation / 291
  - 18.1.2 Solar lighting / 291
  - 18.1.3 Solar heating / 291
  - 18.1.4 Solar rejection of certain wavelengths / 292
  - 18.1.5 Reduction of reflection losses at certain wavelengths / 292
- 18.2 Fabrication / 292
- 18.3 Applications / 294
  - 18.3.1 Photovoltaic concentration / 294
  - 18.3.2 Daylighting / 297
  - 18.3.3 Thermal / 298
  - 18.3.4 Solar chemistry and detoxification / 299
  - 18.3.5 Antireflection / 300
- 18.4 Conclusion / 300
- References / 301

**Chapter 19. Analytical Theory for Efficient Surface-Relief Gratings in the Resonance Domain / 307***M. A. Golub and A. A. Friesem*

- 19.1 Introduction / 307
- 19.2 Surface-relief Grating and Corresponding Graded-index Diffraction Grating Model / 308
- 19.3 Coupled-wave Equations for the Surface-relief Grating / 312
- 19.4 Resonance-domain Surface-relief Gratings with High Diffraction Efficiency / 317
- 19.5 The Limits for the Equivalent Graded-index Model of the Efficient Surface-relief Grating / 324
- 19.6 Conclusion / 326
- References / 326

**Chapter 20. From Holography to Relativity / 329***Nils Abramson*

- 20.1 Introduction / 329
- 20.2 The Holodiagram: A Practical Device for the Creation and Evaluation of Holograms / 329
- 20.3 Light-in-flight Recording by Holography / 332
- 20.4 Einstein's Special Relativity Theory / 333
- 20.5 Spheres of Observation Transformed into Ellipsoids of Observation / 336
- 20.6 Graphic Calculations of Time Dilation and Apparent Lorentz Contraction / 339
- 20.7 Intersecting Minkowski Light Cones / 341
- 20.8 Conclusion / 343
- References / 344

**Chapter 21. The Bizarre World of the Holographic Brain / 347***H. John Caulfield*

- 21.1 Introduction / 347
- 21.2 Beliefs about Holograms / 348
- 21.3 Beliefs about Brains / 351
- 21.4 Attributions to Pribram / 352
- 21.5 Attributions to Bohm / 353
- 21.6 Selected Nonsense for Bathroom Reading / 353
- 21.7 Beyond Science / 355
- References / 355
